Workshop Objectives:

- Understand how brains and bodies are governed by daily clocks that resist the scheduling demands of shiftwork in our 24/7 society
- Learn what animal studies indicate about health consequences of circadian disruption and how flexibility of clocks can be enhanced
- Discover how inadequate sleep significantly impairs cognitive and work performance
- Examine common problems experienced by shift-workers and learn practical techniques for minimizing disruption of circadian clocks
- Implement strategies for combating insomnia and other sleep disorders and getting the most restorative value of sleep
